**EFI Proof Paper 9120XF Matt** **(120 g/m²)**

Controlled ΔE<1,2 Consistency

64 INCHES

Matt coated, taylor made for contract-proofing applications. For affordable prints with high color fidelity. **This proofing paper contains almost zero optical brighteners.** The special coloring and **the high L-value of 96,5** make this paper especially suitable for the simulation of matt printing media

## EFI Proof Paper 9150 Semimatt (150 g/m²)

Controlled ΔE<1,0 Consistency

The EFI Proof Paper 9150 semimatt for use with both pigmented and dye-based ink, was specially developed for the offset proofing market. It is an ideal product for all applications with color accurate demand. The very low content of optical brighteners eliminates an important source of metamerism effects. Due to its neutral paper shade (LAB-Value: 95.59; 0.6; -2.3) this paper is highly recommended to simulate all common reference papers of the offset printing industry. In most cases the simulation of the paper white becomes redundant due to the adjusted coloration of the paper. This media is compatible for proof creation according to ISO 12647-7.

*(By using the K3 inks, the gamut of the ISO coated V2 cannot be covered in the magenta-red-area. For this purpose we suggest the the FograCert EFI Offset Proof Paper 9100/9200 Semimatt or the EFI grades 4245 or 6225XF Semimatt. Please note: The paper types ISO web-coated (PT3) and ISO uncoated (PT4) can be covered in combination with the K3 inks.)*

***) All roll units are supplied with each two adapters 3" to 2" core.**

*****) Suitable e. g. for HP DesignJet 70 and 90 Series**

## EFI Remoteproof Paper 9180 Semimatt (180 g/m²)

The EFI Remoteproof Paper 9180 semimatt for use with both pigmented and dye-based ink, was specially developed for the offset proofing market. It is an ideal product for all applications with color accurate demand. The very low content of optical brighteners eliminates an important source of metamerism effects. Due to its neutral paper shade (LAB-Value: 95.59; 0.6; -2.3) this paper is highly recommended to simulate all common reference papers of the offset printing industry. In most cases the simulation of the paper white becomes redundant due to the adjusted coloration of the paper. The extraordinary consistancy and stability of the 9180 matches all critical specifications for remoteproof applications. This media is compatible for proof creation according to ISO 12647-7.

*(By using the K3 inks, the gamut of the ISO coated V2 cannot be covered in the magenta-red-area. For this purpose we suggest the the FograCert EFI Offset Proof Paper 9100/9200 Semimatt or grades EFI 4245 Semimatt/EFI 6225XF Semimatt. Please note: The paper types ISO web-coated (PT3) and ISO uncoated (PT4) can be covered in combination with the K3 inks.)*

## EFI Offset Proof Paper 9100 Semimatt (140 g/m²)

The EFI Offset Proof Paper 9100 Semimatt is a taylormade offset proofing media for use with both pigmented and dye-based ink. The very wide color gamut and the consistent quality covers the paper type classes PT1, PT2 and PT3. The 9100 offers the look and feel of an actual offset press stock. The very low content of optical brighteners guarantees a high color stability - metamerism effects are minimised. This media is Fogra substratecertified and thus very compatible for proof creation according to the ISO 12647-7 norm.

## EFI Offset Proof Paper 9200 Semimatt (200 g/m²)

The EFI Offset Proof Paper 9200 Semimatt media features a white point and gamut capacity that meets the requirements of high-end offset proofing. The appearance (haptic) resembles typical offset production paper. A very low content of optical brighteners guarantees a high color stability - metamerism effects are minimised. Due to its neutral paper white (LAB-Value: 96.7, 0.7, -1.2) the 9200 is highly recommended to simulate all common reference papers of the offset printing industry. In most cases the simulation of the paper white becomes redundant. The EFI Offset Proof Paper 9200 is delivered with an EFI backside printing and is compatible for proof creation according to ISO 12647-7.

Controlled ΔE<1,5 Consistency

fogra cert Proof substrate | 22690

CRACoL SWOP GRACoL CERTIFIED PROOFING SYSTEM Proof Predictability

The FograCert EFI Gravure Proof Paper 4245 Semimatt is designed for use with the latest ink generation of the leading printer manufacturers (K3, Lucia, Vivid, Vivera, etc.). It meets the industry's most stringent quality and consistency requirements. A very low content of optical brighteners guarantees a high color stability - metamerism effects are minimised. The microporous, PE coated media hits the Fogra Norm 39L without any problems. The white point of the 4245 barely departs from the predetermined value defined by ISO 12647-7. In most cases the simulation of the paper white becomes redundant.The 4245 provides users with simplified installation, improved productivity, increased profitability and ease of use - all with the consistency and reliability sealed by CRACoL/SWOP (granted for #3) and FOGRA Cert for proofing substrate (ISO 12647-7). The #1 bestseller out of the EFI Paper range is supplied with the EFI-FOGRA print on the backside. Naturally this media is compatible for proof creation according to ISO 12647-7.

SWOP GRACoL IDEAlliance CERTIFIED PROOFING PROCESS Print Predictability

PEFC™ PEFC/04-31-1091

The EFI CertProof Paper 6225XF Semimatt is a universal purpose PE-coated, microporous paper designed for offset and gravure proofing. It shows outstanding results with the latest ink generation of the leading printer manufacturers (K3, Lucia, Vivid, Vivera, etc.). With its very wide color gamut the media is capable of Spot-Color Proofing and meets the industry's most stringent quality and consistency requirements. The huge gamut covers paper type classes PT1, PT2 and PT3, furthermore this grade is FOGRA/ISO 12647-7 and SWOP/GRACoL #1 certified. The EFI CertProof Paper 6225XF has almost no optical brighteners which minimises metamerism and reduces measurement errors in the profiling process. It is supplied with the EFI-FOGRA print on the backside. Naturally this media is compatible for proof creation according to ISO 12647-7.

## EFI FlexoProof Glossy-Film (130 µ)

Controlled ΔE<1,5 Consistency

fogra cert Proof substrate | 21210

The EFI Flexo Proof Glossy Film features a very high ink capacity and an extremely huge color gamut. Due to that the white film meets all requirements of high-end spot-color-proofing in the commercial packaging- and flexoprinting industry.The EFI Flexo Proof Glossy Film is designed for use with the latest ink generation of the leading printer manufacturers (K3, Lucia, Vivid, Vivera, etc.).The substrate covers the ISOcoated V2 color gamut easily. This media is Fogra substratecertified and thus very compatible for proof creation according to ISO 12647-7

***) All roll units are supplied with each two adapters 3" to 2" core.**

## EFI Production Textile-Banner 1155 (155 g/qm)

High-grade, water-resistant textile material (100% Polyester) with special, high-resolution matt inkjet coating. For displays, banners and exciting product presentations. Due to the water resistance (only with pigmented inks) and the B1 certification, the EFI Textile Banner is suitable for inside and outdoor applications. Also suitable for roll-up and other display-systems.

***) All roll units are supplied with each two adapters 3" to 2" core.**

## EFI Production ecoS Paper HG225 High-Gloss (225 g/m²)

High resolution PE-micro porous coated true photo high-gloss paper, instant dry, for versatile indoor- and outdoor photorealistic prints

PEFC™ PEFC/04-31-1091

**ecoS benefits:**
* For true photorealistic prints
* High color density
* Excellent detail resolution
* For indoor and outdoor applications
* Outdoor durability up to 2 years without laminating
* Smear resistant
* Scratch resistant
* Suitable for all types of solvent and UV inks

## EFI Production ecoS Backlit BLG150 Glossy (150µ)

64 INCHES

High resolution coated Backlit Film with a gloss effect for high quality prints. High color brilliants for day and night applications. In combination with the EFI XF Rip and EFI profiles this new product needs to be printed only once ("single-strike"). This is a real advantage compared to other Backlit printing solutions.

**ecoS benefits:**
* Suitable for photo realistic prints
* High color density
* High gloss effect
* Good scratch resistance
* Very good resistibility against high moisture
* Outdoor durability up to years without
* Water resistant
* Suitable for all solvent and UV inks

## EFI Laser Paper DUO-Semimatt 130SM (130 g/m²)

DUO

Semimatt paper, for high color fidelity laser printing. Appearance similar to offset production paper (LAB-value: 93.5, 1, -1.3). Lower toner consumption enables faster running. Optimal toner adhesion allows folding. Suitable for duplex printing.

| **EFI Proof Premium Paper 8260 Semiglossy** **(260 g/m²)** | | | | | | ■ | | | | | | |
| Premium Proof paper, semiglossy, wipe fast, very fast drying and for universal use. The outstanding color gamut of this especially for offset printing developed paper is compatible to the paper types classes 1 and 2 of the ISO 12647-2. The paper white is close to the isocoated value, and with it's high L-value you can easily do a paper white simulation. The LAB values are 96.3; -0.1; -4.3, and the opacity is 98 %. Furthermore this Premium Proof paper has a PE microporous coating and a very good flatness, even when using rolls. | | 6086210297 | 100 sheets | DIN A4 | | | | | | | | ☒ PROOFING SOLUTIONS |

Controlled ΔE<1,5 Consistency

The EFI Budget Proof Paper 3170 Semimatt is the ideal product for all applications with color accurate demand. It is featured by a wide color gamut and a very short drying time.This competitively-priced media is compatible for proof creation according to ISO 12647-7.

*(By using the K3 inks the gamut of the ISO coated V2 cannot be covered in the magenta-red-area. For this purpose we suggest the FograCert EFI Gravure Proof Paper 4245 Semimatt, EFI CertProof 6225XF or EFI Offset Proof Paper 9100/9200 Semimatt. Please note: The paper types ISO webcoated (PT3) and ISO uncoated (PT4) can be covered in combination with the K3 inks.)*

***) All roll units are supplied with each two adapters 3" to 2" core.**
